DETAILED ACTION

Amendment

1. Acknowledgement is made of Amendment filed 9 April 2004, and Terminal Disclaimer of prior U.S. patent No. 6,053,030 filed 24 June 2004.

Allowable Subject Matter

2. Claims 1-5 and 7-17 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The record of prior art fails to teach an accountability and identification system, including a plurality of touch sensors, each touch sensor including a memory and information stored in the memory; at least one of the touch sensors being a personal identification touch sensor having user information on a unique user stored in the memory; at least one of the touch sensors being a data touch sensor having user information on a unique group of users stored in the memory; and at least one instrument, each instrument including a receptacle adapted for momentarily receiving the personal identification touch sensor to read the user information stored therein, a microprocessor in electrical communication with the receptacle, the microprocessor having a memory portion for storing operating software and the user information read by the receptacle, and a display in electrical communication with the microprocessor, the display providing a visual indication of portions of the user information selected by the operating software.

Whalen, Jr. et al. (US 6,029,889; hereinafter "Whalen, Jr.") teaches an accountability and identification system, comprising: a memory and information stored in the memory, a bar-coded unique user information stored in the memory; at least one instrument including a receptacle adapted for momentarily receiving the personal identification to read the user information stored

therein, a microprocessor in electrical communication with the receptacle, the microprocessor having a memory portion for storing operating software and the user information read by the receptacle, and a display in electrical communication with the microprocessor providing a visual indication of microprocessor, the portions of the user information selected by the operating software.

Campman (US 6,016,099) teaches automatically active personal alert safety system for accounting for firefighters at a fire scene and also assuring that a firefighter has his pass device turned on automatically.

Stumberg et al. (US 5,689,234; hereinafter "Stumberg") teaches a system allowing firefighter to monitor a variety of safety related parameters during firefighting activities through audible and/or visual means.

However, Whalen, Jr., Campman, and Stumberg, taken alone or in combination thereof, fails to teach an accountability and identification system, including a plurality of touch sensors having information stored therein; at least one of the touch sensors being a personal identification touch sensor having user information on a unique user stored in the memory; at least one of the touch sensors being a data touch sensor having user information on a unique group of users stored in the memory as set forth in the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
